

Massachusetts Organization for Addiction Recovery

# MOAR

## Resources for Recovery

A Mini Guide with  
**MOAR** to come!

---

**Join the Voices for  
Recovery!**

# A Collective Voice for Addiction Recovery

Thank you, **MOAR** members, – individuals, families, and friends for recovery guiding the process to update our famous resource guide! Please view our “**MOAR** Mini-Guide with **MOAR** to Come”, which provides information on prevention, treatment, and recovery resources. Of course, we are listing **AREAS**, or **Addiction Recovery Education Access Services**, our recovery services program. We also have a project called **SOAR**, (**Speaking Out for Addiction Recovery**,). **SOAR** serves as a hub to connect recovery community organizations to collaborate and mobilize on shared concerns.

The following pages are a “how-to” guide meant to support individuals and families seeking help with the recovery process. We need your input to ensure it is comprehensive and beneficial to everyone, so please continue to let us know what additions you would like to see.

**MOAR** provides the opportunity, via our action for recovery meetings, trainings, and public events, for those with lived experience to learn to tell their stories.

This “Mini-Guide” is an example of how we help all to navigate the complex continuum of care. We are helping the public see that recovery is possible, and all still struggling require compassion and support. Throughout COVID 19, we continued to gather “virtually” on a regional and statewide basis connecting to demonstrate that the recovery community inclusive of families are “visible, vocal, and valuable” and will be victorious. We are doing some activities hybrid style meaning in person and online. Please visit our website at [www.moar-recovery.org](http://www.moar-recovery.org) and our Facebook Page (@MOARRecovery) to find out what is happening! Our members are our driving force.

We are grateful to our funders, especially the Bureau of Substance Addiction Services (BSAS) Massachusetts Department of Public Health, SAMHSA (The PAREnT Project), Blue Cross Blue Shield Foundation of Massachusetts, RIZE Foundation, Attorney General’s Office (Cultural Humility Grant), and Greater Boston Council on Alcoholism for their support! Thank you to Bay State Community Services for fiscal sponsorship.

**We thank our members. We are tremendously grateful for your support, which makes **MOAR** possible.**

## Mission

Our mission is to organize recovering individuals, families, and friends into a collective voice to educate the public about the value of recovery from alcohol and other addictions.

## Vision

**MOAR** envisions a society where addiction is treated as a significant public health issue and recovery is recognized as valuable to our communities.

## Message

**Faces and Voices of Recovery ~ Visible, Vocal, Valuable**

**MOAR** welcomes you and encourages all to speak up for recovery, at the same time acknowledges that there may be risks, which need to be reviewed. Certain forums may include the public and the press. While this may be exciting to some people, it may pose a risk for others.

**MOAR** encourages you to make the choice most helpful to you.

## Diversity, Equity & Inclusion Statement

**MOAR** is a voice for all people seeking the benefits of recovery. We are committed to doing the work necessary to address the struggles and inequities diverse groups of people face while seeking recovery services. Systemic racism, prejudice, and bias have been deeply ingrained in the history of the American health care system. **MOAR** is committed to work to create a collective voice for those seeking recovery for all people who have been historically underserved, marginalized, and oppressed.

## A Commitment to Help End Racism

**MOAR** continues to speak out about the brutal killings of George Floyd, Manuel Ellis, and the many other victims of racial violence. We share the anger related to these tragedies. We join the calls for justice and the elimination of racism, violence, and social inequity.

The murder of George Floyd underscored the persistence of structural racism and brutal violence against Black and Brown people in this country. We learned of another Black man who died while pleading, “I can’t breathe.” It was Manuel Ellis, a 33-year-old man in recovery from substance addiction, who died of oxygen deprivation caused by a cruel restraint method used by law enforcement.

**MOAR** understands that the killing of unarmed Black people has to do with the ways that racism is embedded in the structure of U.S. society. And we stand in agreement with the American Medical Association, the American College of Physicians, and the American Academy of Pediatrics: **Racism is a Public Health Issue.**

In our work at **MOAR**, we wholeheartedly believe that recovery is for everyone. The **MOAR** Mission is to organize recovering individuals, families, and friends into a collective voice to educate the public about the value of recovery from alcohol and other addictions. We want to help eliminate disparities related to substance addiction, health care and for the justice involved.

We support protesters in their calls for justice. Enough is enough. Racism in all forms must stop. This requires systemic changes not only to policing, but all aspects of our society. As an organization, **MOAR** is dedicated to the respective role we play in addressing these issues. As we call for system changes to do better, we know that we, as an organization, must do better.

**MOAR** recognized that as an organization, that we needed to improve how we address systemic racism and the health disparities that manifest for Black and Brown people with substance addiction. In early 2020, we brought in an innovative team of experienced diversity consultants to engage us in a thorough organizational assessment. We reviewed and continue to review our internal and external practices to make the fundamental changes necessary to be a truly inclusive organization. Seeking out injustices is everyone’s responsibility.

**MOAR** commits to work alongside and listen to the voices of all communities and take concrete measures to eliminate racial disparities in accessing recovery services. Let us all strive for racial equity.

It has been over a year since we put our commitment into print. Since then, we have formed two committees and created a new position.

- **Our Language and Curriculum Committee** provided a strategy for updating our resources to reflect our commitment to equity, inclusion, and diversity. We will be editing our educational materials to include the voices and direction from communities of color and other under-represented communities.
- **The Allyship & Partnership Committee** is leveraging our networks of allies and partnerships, as well as resources, to create and sustain an environment that is equitable, inclusive, and diverse for all.
- **Our Diversity Chair** is helping **MOAR** organize and stay focused on truly reflecting equity, inclusion, and diversity. **MOAR** is moving forward with strategic support and action.

# Alcohol and Other Drug Continuum of Care

## WMS/Detox/ATS

Acute Treatment Services (ATS) are now called 24-Hour Diversionary Withdrawal Management Service (WMS). This means 24-hour substance use disorder treatment services are provided in freestanding or hospital-based settings with 24-hour, seven-day per week nursing and medical supervision that include withdrawal symptom management as part of medically supervised withdrawal and/or induction onto maintenance treatment. The expectation of all services as well as this setting is the provision of patient care to plan for discharge and continuity of services including direct referrals.

## Transitional Support Services

Transitional Support Services (TSS) are short-term residential programs for individuals who need further stabilization after detoxification. Admission is limited to patients without housing and those discharged from WMS. The average length of stay is 14 to 21 days. TSS programs provide 24- hour, structured, and supportive residential housing, and services. Case management and psychoeducation are available to assist patients in implementing an Individual Service Plan. Case managers provide linkages and inter-agency collaboration to next step programs and assist in obtaining the necessary credentials to apply for social service benefits, such as a copy of a birth certificate, identification, and more.

## Recovery Homes

Recovery Homes provide an alcohol and drug free environment for individuals recovering from addiction. These programs emphasize recovery and treatment within a structured, therapeutic setting. Residents are encouraged to integrate into the community and to access resources from multiple pathways and employment support. Social Model programs emphasize a sober living environment, peer counseling and case management. The goal of these programs is to assist residents to provide each other with a culture of recovery, support, sharing and positive role modeling.

*\* Facilities that offer provisions for pregnant and parenting women with an infant.*

## Family Residential Services

Specialized Residential Services for Families provide a safe and supportive treatment environment for unhoused families and with a parent(s) who has a chronic substance addiction problem. Programs provide shelter, case management, and coordination of treatment and other services to support and sustain recovery.

<b>Angel House</b>	Hyannis	508-775-8045	<a href="http://www.haconcapecod.org">www.haconcapecod.org</a>
<b>Entre Familia Program</b>	Mattapan	617-534-7968	<a href="http://www.bphc.org">www.bphc.org</a>

## Co-Occurring Enhanced Residential Programs

Like traditional recovery homes, these programs provide long-term, structured, residential treatment. They are specially designed to meet the needs of people recovering from both SUD and mental health conditions.

## Therapeutic Communities

Therapeutic Communities provide an environment that emphasizes residential treatment and recovery within the parameters of the program structure. The residents take an active role in this mode of treatment, helping them to take responsibility and become positive role models.

<b>Dimock Askia (men)</b>	Roxbury	617-442-8800 ext. 1654	<a href="http://www.dimock.org">www.dimock.org</a>

## Mental Health Family Support

**National Alliance on Mental Illness:** NAMI, the National Alliance on Mental Illness, is the nation’s largest grassroots mental health organization dedicated to building better lives for the millions of Americans affected by mental illness. NAMI of MA offers support groups, peer resources that can be found at their website:

[www.namimass.org](http://www.namimass.org)  
 NAMI Greater Boston Consumer Advocacy Network  
 617-626-8691

## PPAL: Children’s Mental Health

Providing hope for children with mental health needs and their families through education, advocacy, outreach, and support.

Parent/Professional Advocacy League (PPAL):  
 The Massachusetts Family Voice for Children’s Mental Health  
 Website: [www.ppal.net](http://www.ppal.net)

## Regional Learning Communities

DMH has funded Recovery Learning Communities in all 6 DMH service areas. Regionally located, these peer-operated “hubs” coordinate peer-run peer support, education, advocacy, and other regional peer-run activities. By supporting and strengthening a regional peer-run network, DMH aims to promote a system that is increasingly consumer driven, where peers are more fully integrated into their community.

## Faith Based Recovery

The recovery journey for many is experienced within the framework of religious experience, beliefs, and rituals and/or within the mutual support of a faith community. Faith-based recovery frameworks may serve as adjuncts to traditional recovery support programs or serve as alternatives to them.

## Support After a Death by Overdose

[www.sadod.org](http://www.sadod.org)

SADOD provides resources, information, and assistance to people throughout Massachusetts who have been affected by the death of someone they care about from a substance-use-related cause. Our focus is on increasing the capacity and effectiveness of peer grief support for bereaved people, frontline care providers, and people in recovery or struggling with drug use. We hope you find useful tools here that meet your needs, and we welcome your feedback about how this website can be improved.

## The Sun Will Rise Foundation

<http://www.thesunwillrise.org/>

The primary focus of The Sun Will Rise Foundation is to provide free peer grief support for those who have experienced the devastating death of someone they care about due to substance use (drug/alcohol) or overdose.

## Youth Prevention Initiatives

The third Massachusetts Collaborative for Action, Leadership, and Learning (MassCALL3) award replaces DPH's previously funded Substance Misuse Prevention Grant Programs.

Currently 31 grants have been distributed. Mass Call 3 is overseen by The Massachusetts Department of Public Health, Bureau of Substance Addiction Services.

For More Information Contact:  
Prevention Services Director, Jose Morales  
[jose.morales@state.ma.us](mailto:jose.morales@state.ma.us)

## MA BSAS/DPH Funded Opioid Overdose Prevention/Narcan (Naloxone) Trainings

Overdose Education and Naloxone Distribution (OEND) Programs in

## Medication for Opioid Use Disorder Treatment

Opioid Treatment provides medically monitored treatment services for clients who are addicted to opiate drugs such as heroin or pain medications. Services combine medical and pharmacological interventions (such as methadone or buprenorphine) with professional outpatient counseling, education, and vocational services. Services are offered on both a short- and long-term basis.

## Get Help

Do you or a loved one struggle with problematic gambling?  
Helpline Specialists are available 24/7  
Call 1- 800-426-1234

### **Are you wondering if you should attend a support meeting for what might be a problem with gambling?**

Find a meeting near you. There is NO COST to participate or attend a meeting. You do not have to call ahead to attend and are welcome at any time.

**Gamblers Anonymous (GA)** and **Bettors Anonymous (BA)** are self-help meetings based on the same 12-step concept as Alcoholics Anonymous (AA) and Narcotics Anonymous (NA). Gamblers Anonymous also offers a weekly phone meeting for those who are unable to attend or prefer not to meet in person. The phone meeting is held every Wednesday night from 9:00 PM– 10:30 PM EST, just call 712-770-4160 and use access code 611704# to access the meeting.

**Smart Recovery** offers face-to-face meetings, online meetings, and online self-help chat.

**Gam-Anon** is a support group specifically for families and loved ones of people experiencing problems with gambling.

**In The Rooms** is the world's largest online social network for the global recovery community. It's for people already in recovery, those seeking immediate help from any addiction, and for the families, friends, and allies of those people.

**GamTalk** is a supportive community helping people with gambling issues share their experience and ideas. Joining is free, completely anonymous and lets you take part in community discussions, scheduled chat sessions and more.

## Youth, Transition Age Youth, and Young Adult Services

These services promote wellbeing by building on strengths and by preventing and treating substance use disorders, HIV infection, and other risk-taking behaviors. Services target individuals ages 12 to 25 who are at increased risk for alcohol and/or other drug related use.

Some services may be provided in schools, courts, community agencies, and housing projects and/or on the street, and may offer education/skill building, alternatives to substance use, youth development, problem identification, and referrals. Service types include Outpatient Counseling, Residential and Justice Involved Collaboratives.

---

**If you perceive symptoms of what could be alcohol or drug use problems with a young person**

**Call the Massachusetts Substance Addiction  
Information and Education Helpline  
1-800-327-5050**

The Massachusetts Helpline will work with families and other key stakeholders to devise the most appropriate course of action for adolescents and young adults ages 12-25 in need of treatment for their use of substances.

Options include:

1. Placement in a stabilization program
2. Placement directly at residential programs without a prior stay at stabilization level of care
3. Referrals to statewide outpatient, community-based Adolescent Community Reinforcement Approach (A-CRA) services

## Youth Intervention Programs

## Outpatient Counseling For Youth (Ages 12-24)

The Massachusetts Department of Public Health, Bureau of Substance Addiction Services supports and licenses outpatient providers to offer individual, group, and family therapy for alcohol, marijuana, and other drugs. Some outpatient providers have specialized training and certification in offering substance use and behavioral treatment for youth and young adults such as the Adolescent

Community Reinforcement Approach (A-CRA). A-CRA is a behavioral intervention for youth and young adults ages 12-24 that seeks to increase the family, social, and educational/vocational reinforcers of an adolescent/young adult to support recovery from substance misuse and dependence. There are A-CRA sites across the Commonwealth. For more information, contact:

**Address:** 151 Merrimac St. 6th Floor, Boston, MA 02111

**Email:** ARMSMGH@partners.org

## Helping Children Affected by Another Person's Substance Use

COASA supports children of alcoholism and substance abuse by serving as an advocate for them in community forums and by developing appropriate supportive educational groups for children of alcoholics and other substance abusers in Boston. COASA facilitates school and community-based prevention/intervention services, adapting them for the needs of the children we serve.

The program provides the children with a framework for understanding what they are experiencing and teaches them to break the “don’t talk, don’t trust, don’t feel” rules they live within at home. The children learn about the “7 C’s” (They didn’t CAUSE it, can’t CURE it, can’t CONTROL it, can take CARE of themselves, can COMMUNICATE their feelings, can make healthy CHOICES, and can CELEBRATE being themselves). The purpose of the program is to provide ongoing validation, support in developing positive social skills and improvement of individual self-esteem. COASA works within the Boston neighborhoods with the drug coalitions now in place and with the Massachusetts Organization for Addiction Recovery. The program offers resources to the children, whether the parents are in treatment or not.

COASA (A project of Robert F. Kennedy Children’s Action Corps)

## STAGES PARENTS GO THROUGH

*By Diane Kurtz and Tanyss Martula*

*Parents Support Group of Western Massachusetts*

1. **Search** for the reason for the changes in our child.
2. **Question** possibility of substance abuse.
3. **Question child:** accept their answer that they are not using.
4. Our own **denial** of any substance abuse.
5. **Frustration**
6. **Reality** that substance abuse is the problem.
7. **Fear** to search for the **reasons** why this happened.
8. **Guilt** for not realizing earlier.
9. **Feeling** like a failure as a parent.
10. **Shame** of our family situation with outsiders.
11. **Grief** for the loss of the dreams we had for our child.
12. **Acceptance** of substance abuse as reasons for changes.
13. **Action** finds a way to cope.
14. **Learn** how to let go to save our own sanity. Learn some skills to let them feel their own consequences because of their own choices and realize it is not our responsibility to always find their answers.
15. **Learn** to distinguish the difference between the behavior of the child with the disease and the child himself.
16. Be **aware** we do not have to accept unacceptable behavior.
17. **Understand** that our children will take their own action. (We can provide some information and guidelines, stick to them, and then let our children make their own choice on which avenue to take.) It may be that the course taken would not be of our choosing but necessary to allow them to see where this road leads them.

*Above All We Must Learn How to Take Care of Ourselves and Make A Life for Ourselves Regardless of The Pain We Feel Our Children Are In. Pain Is Growth... In Our Growing Up Process, We've All Experienced It One Time or Another and Learned from It.*

*The Following Text Is Based on the Facilitator’s Family Personal Experiences*

**Search**

We tried to search for a reason that would explain our child’s behavior. In the beginning we thought this was just normal adolescent behavior.

Is he unhappy? Does he have enough friends? Is school going well? Are the teachers treating him as unfairly as he says they are?

A lot of children skip a class or a school day, or marks fall as school becomes harder. A lot of children isolate and do not want to be involved in family functions, or they become secretive.

But there were the times that our child would call at a late hour and ask to sleep at a friend’s. This was a clue. Most children would ask in advance to sleep out. If refused permission to do so, they would accept a “no” for an answer. Our child never accepted that answer. After a while, if permission wasn’t granted, he would just start swearing, hang up and not return home until late the next day. All the above was a direct result of our child’s drug and alcohol use.

**Question**

We had a lot of questions: Was this normal adolescent behavior? Was this how other children acted or was this different? Could this be a psychological problem? Could medication help?

We were totally confused. We went to the pediatrician for help, and he felt that what we were experiencing was normal adolescent behavior, but my gut kept telling me to look further. Finally, the possibility of drugs came into play, and it scared us to death, but we had to really look at this. After all what did we know about substance abuse? Time to find out as much as we could. After all, this was our son’s life we were talking about. If it is substance abuse, now what?

**Asked the question**

We asked our son if he was using any substances. Oh good – he said no! He could not believe we would even ask such a question. He said we had told him how dangerous this was, and he was listening. We are so thankful that the answer was no. What had we been thinking?

## **Denial**

Because of the answers we received, we did not, want to believe it was substance abuse. We thought he was perhaps just having a hard time coping with being a teenager. This kind of attitude kept us in the dark for longer and allowed our son to become sicker and sicker. He was good at making sure he stayed in denial as long as possible. After all, if we caught on, his life would change... and so would ours.

## **Frustration**

We continued to battle with ourselves about what was really going on. It became one of the most frustrating times in our marriage. When my husband was ready to look at things for what they really were, I was not. If I was seeing things clearly, he was not. We played this seesaw game for a while. It was one of the hardest times for the two of us.

## **Reality**

It became clear that substance abuse was what had changed our son. We could see visible changes: in friends, clothing, eating habits, sleeping habits, secrecy. Our child had become someone else. We started finding what appeared to be cigarette particles in his clothing pockets and papers to roll cigarettes. He could not or would not hide these things anymore.

## **Fear**

We're so scared. What are we to do? What if our son won't accept help? Where do we go for help? What if he dies? We've got to do something – but what?

## **Search for a reason**

Maybe we were bad parents? Maybe we did not love our son enough? Maybe we made him feel bad and that was why? All these questions and we had no answers. We were good parents; we did love him enough. We never gave him a reason to do drugs to cope with life.

As it turned out we learned that this is a disease and that our son did not choose to have it but did. We, as his parents, did not bring this on. There basically was no other reason our son had a disease called addiction.

## **Guilt**

We feel so guilty that we did not see earlier this for what it was. We should have been able to tell. Could he have gotten sicker because of us and our not dealing with this? We feel so bad. No matter how bad you feel, no amount of guilt is going to change what has happened. Parents love their children. Some

children make bad choices; sometimes even when they have been instructed otherwise. We did not put the first substance in our son's body, he did. We should not feel guilty for where we are now.

### **Feelings**

One of the strongest feelings we had to cope with was the belief that we had failed as parents. We started looking at ourselves in comparison to others. What we needed to understand was that other people whose children did not suffer from the disease of addiction were not experiencing what we were. We weren't failures, we were just uneducated in this area of life.

Feeling like failures just prolonged our ability to do something. What we needed to do was learn as much as possible about this disease so we could do something.

### **Shame**

Shame was one of the things that kept us from talking about what was going on in our home. We found ourselves acting as if everything was okay. It was a big burden to continue to try and hide what the disease of addiction had done to our marriage and our family.

It wasn't until our shame became overwhelming that we finally talked to someone about what was really going on. Then, we were able to find help. We finally got the courage to go to group therapy, family counseling and take back control of our home.

### **Grief**

We finally came to an understanding that we were grieving for what could have been. We could see that our child was not going to walk the same road as other children. As it was, he never went to a prom, never graduated from high school, or went to college the way our friends' children did. We needed to allow ourselves to grieve then let go of our expectation of what we thought would happen normally.

### **Acceptance**

As difficult as it was to accept that substance abuse was the problem, we had no choice but to do so. Acceptance was required for us to take the next steps. Acceptance also helped us to stop searching for a reasonable explanation for the behavior change. Now we understood.

**Action**

Now that we understood what was happening with our child, we needed to find a way to cope. We looked for support systems that could help us change our outlook and actions concerning our son.

**Learn**

We learned, with the help of a self-help group, how to let our son feel the consequences of his choices. This is one of the hardest steps to take. As parents, we were used to stepping in and protecting, that we found it against our natural parenting skills to let our child suffer the outcome. We finally recognized that this was the only way for our child to change his behavior.

**Learn to Distinguish the Difference**

We had to learn to distinguish the difference between the son we raised and the person with the addiction. We needed to allow ourselves to still love our son but not accept the person he became when using. The person we raised was still underneath all the behaviors the disease created.

**Aware**

We needed to have an awareness that would help us to not accept unacceptable behavior. Accepting unacceptable behavior had allowed our child to think we did not need respect and accountability.

**Understanding**

Ultimately, it was necessary for us to understand that the choices our child might make will not always be what we want. The choices can become a learning experience in the recovery process. When we interrupt the choices, we take away the opportunity from our child to learn valuable lessons.

## SAMHSA's Working Definition of Recovery for Addiction and Mental Health

The Substance Abuse and Mental Health Services (SAMHSA) recognizes there are many different pathways to recovery and each individual determines his or her own way. SAMHSA engaged in a dialogue with consumers, persons in recovery, family members, advocates, policymakers, administrators, providers, and others to develop the following definition and guiding principles for recovery. The urgency of health reform compels SAMHSA to define recovery and to promote the availability, quality, and financing of vital services and supports that facilitate recovery for individuals. In addition, the integration mandate in title II of the Americans with Disabilities Act and the Supreme Court's decision in *Olmstead v. L.C.*, 527 U.S. 581 (1999) provide legal requirements that are consistent with SAMHSA's mission to promote a high- quality and satisfying life in the community for all Americans.

**Recovery from Mental Disorders and Substance Use Disorders:** A process of change through which individuals improve their health and wellness, live a self-directed life, and strive to reach their full potential. Through the Recovery Support Strategic Initiative, SAMHSA has delineated four major dimensions that support a life in recovery:

***Health:*** Overcoming or managing one's disease(s) as well as living in a physically and emotionally healthy way

***Home:*** A stable and safe place to live

***Purpose:*** Meaningful daily activities, such as a job, school, volunteerism, family caretaking, or creative endeavors, and the independence, income, and resources to participate in society

***Community:*** Relationships and social networks that provide support, friendship, love, and hope.

## **Guiding Principles Of Recovery**

***Recovery emerges from hope:*** The belief that recovery is real provides the essential and motivating message of a better future – that people can and do overcome the internal and external challenges, barriers, and obstacles that confront them. Hope is internalized and can be fostered by peers, families, providers, allies, and others. Hope is the catalyst of the recovery process.

***Recovery is person-driven:*** Self-determination and self-direction are the foundations for recovery as individuals define their own life goals and design their unique path(s) towards those goals. Individuals optimize their autonomy and independence to the greatest extent possible by leading, controlling, and exercising choice over the services and supports that assist their recovery and resilience. In so doing, they are empowered and provided the resources to make informed decisions, initiate recovery, build on their strengths, and gain or regain control over their lives.

***Recovery occurs via many pathways:*** Individuals are unique with distinct needs, strengths, preferences, goals, culture, and backgrounds including trauma experiences that affect and determine their pathway(s) to recovery.

Recovery is built on the multiple capacities, strengths, talents, coping abilities, resources, and inherent value of each individual. Recovery pathways are highly personalized. They may include professional clinical treatment; use of medications; support from families and in schools; faith-based approaches; peer support; and other approaches.

Recovery is non-linear, characterized by continual growth and improved functioning that may involve setbacks. Because setbacks are a natural, though not inevitable, part of the recovery process, it is essential to foster resilience for all individuals and families. Abstinence is the safest approach for those with substance use disorders. Use of tobacco and non-prescribed or illicit drugs is not safe for anyone. In some cases, recovery pathways can be enabled by creating a supportive environment. This is especially true for children, who may not have the legal or developmental capacity to set their own course.

***Recovery is holistic:*** Recovery encompasses an individual's whole life, including mind, body, spirit, and community. This includes self-care practices, family, housing, employment, education, clinical treatment for mental disorders and substance use disorders, services and supports, primary healthcare, dental care, complementary and alternative services, faith, spirituality, creativity, social networks, transportation, and community participation. The array of services and supports available should be integrated and coordinated.

***Recovery is supported by peers and allies:*** Mutual support and mutual aid groups, including the sharing of experiential knowledge and skills, as well as social learning, play an invaluable role in recovery. Peers encourage and engage other peers and provide each other with a vital sense of belonging, supportive relationships, valued roles, and community. Through helping others and giving back to the community, one helps oneself. Peer-operated support and services provide important resources to assist people along their journeys of recovery and wellness.

Professionals can also play an important role in the recovery process by providing clinical treatment and other services that support individuals in their chosen recovery paths. While peers and allies play an important role for many in recovery, their role for children and youth may be slightly different. Peer supports for families are very important for children with behavioral health.

***Recovery is supported through relationship and social networks:*** An important factor in the recovery process is the presence and involvement of people who believe in the person's ability to recover; who offer hope, support, and encouragement; and who also suggest strategies and resources for change. Family members, peers, providers, faith groups, community members, and other allies form vital support networks.

Through these relationships, people leave unhealthy and/or unfulfilling life roles behind and engage in new roles (e.g., partner, caregiver, friend, student, employee) that lead to a greater sense of belonging, personhood, empowerment, autonomy, social inclusion, and community participation.

***Recovery is culturally based and influenced:*** Culture and cultural background in all its diverse representations including values, traditions, and beliefs are keys in determining a person's journey and unique pathway to recovery. Services should be culturally grounded, attuned, sensitive, congruent, and competent, as well as personalized to meet each individual's unique needs.

***Recovery is supported by addressing trauma:*** The experience of trauma (such as physical or sexual abuse, domestic violence, war, disaster, and others) is often a precursor to or associated with alcohol and drug use, mental health problems, and related issues. Services and supports should be trauma-informed to foster safety (physical and emotional) and trust, as well as promote choice, empowerment, and collaboration.

***Recovery involves individual, family, and community strengths and responsibility:*** Individuals, families, and communities have strengths and

resources that serve as a foundation for recovery. In addition, individuals have a personal responsibility for their own self-care and journeys of recovery. Individuals should be supported in speaking for themselves. Families and significant others have responsibilities to support their loved ones, especially for children and youth in recovery. Communities have responsibilities to provide opportunities and resources to address discrimination and to foster social inclusion and recovery. Individuals in recovery also have a social responsibility and should have the ability to join with peers to speak collectively about their strengths, needs, wants, desires, and aspirations.

***Recovery is based on respect:*** Community, systems, and societal acceptance and appreciation for people affected by mental health and substance use problems – including protecting their rights and eliminating discrimination – are crucial in achieving recovery. There is a need to acknowledge that taking steps towards recovery may require great courage. Self-acceptance, developing a positive and meaningful sense of identity, and regaining belief in oneself are particularly important.

SAMHSA has developed this working definition of recovery to help policy makers, providers, funders, peers/consumers, and others design, measure, and reimburse for integrated and holistic services and supports to more effectively meet the individualized needs of those served. Many advances have been made to promote recovery concepts and practices. There are a variety of effective models and practices that States, communities, providers, and others can use to promote recovery.

However, much work remains to ensure that recovery- oriented behavioral health services and systems are adopted and implemented in every state and community. Drawing on research, practice, and personal experience of recovering individuals, within the context of health reform, SAMHSA will lead efforts to advance the understanding of recovery and ensure that vital recovery support and services are available and accessible to all who need and want them.

# FACES & VOICES OF RECOVERY

ADVOCATE. ACT. ADVANCE.

Faces & Voices of Recovery is dedicated to organizing and mobilizing the over 23 million Americans in recovery from addiction to alcohol and other drugs, our families, friends and allies into recovery community organizations and networks, to promote the right and resources to recover through advocacy, education and demonstrating the power and proof of long-term recovery.

## What They Do

- **Mobilize and organize** to raise the profile of the organized recovery community and help more people find recovery by demonstrating that over 23 million Americans from all walks of life have found recovery and promote widespread understanding that long-term recovery is a reality and a process that takes time and support.
- **Build the capacity of recovery community organizations** to thrive and participate in local, state, and national policy arenas, deliver peer recovery support services; and mobilize the local recovery community.
- **Address public policy** to reduce the discrimination that keeps people from seeking recovery or moving on to better lives once they achieve it and support recovery-oriented policies and programs.

## Voter Registration Information

If you are a US citizen, a resident of Massachusetts, and 18 years old on or before election day, you can register to vote. Just fill out a voter registration form online, in person, or mail it to your town or city hall.

If you need help, you can call 1-800-841-2900 (TTY: 1-800-497-4648 for the deaf, hard of hearing, and speech disabled).

## Information for New Voters

### When are elections held?

#### ***State and Federal Elections – Even Years:***

Massachusetts and U. S. elections are held in the even years 2024, 2026, 2028, etc. The Primary election is in September. The General election is on the first Tuesday in November.

#### ***City Elections – Odd Years:***

Non-Partisan City elections are held in the odd years 2023, 2025, 2027, etc. The preliminary election is in September to narrow the field to two candidates per seat. The Final Runoff Election is on the first Tuesday in November.

#### ***Town Elections – Varies:***

Contact your town to find out when the next election is.

### Whom can I vote for?

#### ***City Elections:***

- City Council/Alderman
- School Committee
- Mayor

\*Offices and length of term vary

#### ***State Elections:***

- Statewide offices: Governor, Lieutenant Governor, Attorney General, State Treasurer, Secretary of State and State Auditor (4- year terms)
- State Legislature: 40 State Senators and 160 State Representatives (2-year terms)
- Governor’s Council: 8 Members (2-year terms)
- County Offices: District Attorney, Sheriff, Clerks of Court, County Commissioners, Registrar of Deeds, Registrar of Probate (terms vary)
- Ballot Questions: Initiatives, Referenda, Constitutional Amendments, Local Advisory Public Policy Questions by House, or Senate districts.

***Federal Elections:***

- President/Vice-President (4- year term)
- U.S. Senate (6-year term)
- U.S. House of Representatives (2-year term)

**Where do I vote in person?**

Where you vote depends on where you live. Your street address is part of a ward and precinct. You will vote at the polling location designated for your ward and precinct.

**What if I am out of town on Election Day?**

You may vote by an absentee ballot if you (1) will be out of your city or town on Election Day, (2) are physically unable to go the polls, or (3) cannot vote at the polls due to religious beliefs.

Print an absentee ballot request form. Remember to sign the form and get it in the mail well ahead of the election. If you wish to vote using a mail in absentee form, contact your local election office.

**What if I move before the election? Do I have to register again?**

Yes. Register at your new address by filling out a registration card and mailing it to your local Election Department. If you haven't changed your address, you may be able to vote at your old address. Call your local election department.

You can find your sample ballot for state elections by typing in your address at:

[www.wheredoivotema.com](http://www.wheredoivotema.com)

For city or town ballots contact your local election office.

## About AREAS

- FREE recovery-based curriculum in a group discussion format.
- Peer-to-peer facilitated.
- Topics chosen by group participants.
- Help solving practical problems.
- Strengthen recovery coping and relapse prevention skills.
- Information, resources, and decision-making support.
- Leadership development.
- Opportunities for involvement with **MOAR** in a personal way.

## Are You Interested In?

- Employment and Career Path Preparation.
- Telling your story of recovery with Power!
- Recovery and Groups – Views and Choices.
- Values Building.
- Relapse Prevention.
- Housing in Recovery

*“Before we can educate the public about the value of recovery, we need to heal from our experienced stigma. We don’t know how to get legal, medical, treatment, healthcare services, and we fear asking for help,” came the message from*

**MOAR** participants”

Thus, **MOAR** developed supportive curriculum and resource guides. This is dialogue that allows openness and builds an action plan for recovery.

### **How Does AREAS work?**

Currently, we hold A.R.E.A.S. groups in New Bedford, Brockton, Plymouth, Fitchburg, Worcester, and Northampton. Meetings are in a hybrid model, meaning on Zoom and in-person.

### **Interested?**

Call **MOAR** at 617-423-6627

## Access to Recovery (ATR)

**Massachusetts Access to Recovery (ATR)** is a 6-month program designed for individuals who have a substance use disorder (SUD), and who are seeking support with their recovery. ATR enables participants to create a recovery plan unique to their own needs and choose from a wide range of recovery support services. Both professionals and peers provide services through a variety of community organizations. It is funded by MA DPH/BSAS and federal grants.

ATR is not a self-referral program. If you're not already connected to a treatment and recovery community provider who can make a referral, you can use the MA Substance Use Helpline 1-800-327-5050 to find a provider in your local community.

If you need help and are not yet connected to recovery supports, please contact the MA Substance Use Helpline toll free 1-800-327-5050 to get connected to a treatment or recovery service provider in your area.

## Eligibility Criteria

**Participants must meet all criteria listed below to be enrolled in the Access to Recovery Program.**

1. Participant must have a history of drug and/or alcohol abuse and be motivated to work on recovery.
2. Participant must be in the early stages of recovery (two years or less)
3. Participant must be connected with a provider in the recovery community (only authorized referral portals can make referrals.)
4. Participant must be 18 years or older.
5. Participant must reside in Boston, Springfield/Holyoke, Worcester, or New Bedford, and plan to be there for at least six months.
6. In addition, participant must meet one of the following criteria:
  - Been incarcerated in Massachusetts within the last two years, OR
  - Be involved with a recovery (formerly drug) court in Massachusetts, OR
  - Served in the U.S. Military, OR
  - Be a pregnant, post-partum or parenting woman with children under 18 living in the home.

## How Is ATR Different?

ATR gives you choices about the best way to get the support and services you need and want. You can choose services, activities and people that can best help you. ATR can help you meet with many types of community and faith- based recovery support services. ATR offers many recovery support services. These services may include:

ID Cards	Help with Employment	Bill Paying	Support and skill building
Child Care	Recovery Coaching	Co-Pays	
Basic Needs Fund	Transportation	Housing	

**MOAR** offers Recovery Coaching via ATR!

A Recovery Coach promotes recovery by serving as an individual’s guide and mentor. This coach empowers the individual in their personal journey towards recovery, offering hope, while providing advocacy, guidance, motivation, and knowledge

## How Does ATR Work?

1. You will meet with an ATR Coordinator who will review a recovery plan with you. A recovery plan is a road map that will list your goals and what services you want.
2. You will choose where to get the services you want.

## Current ATR Locations

## MassHealth and Medicare Health Insurance

Find out more about your options for insurance coverage in Massachusetts. MassHealth and/or Medicare may be an option.

MassHealth and Medicare provide free or low-cost health insurance coverage to eligible individuals and families. The guide below provides information on the public insurance programs that are available in Massachusetts, how to determine if you are eligible, and how to apply for coverage.

If you would like to speak with someone who can help you assess your options and walk you through the process, these organizations are ready to help!

### **Health Care For All**

The Health Care For All Helpline offers free multi-lingual statewide assistance with enrolling in health insurance coverage. Call (800) 272-4232 or visit their website to learn more.

Website:  
[hcfama.org](http://hcfama.org)

### **Navigators and Certified Application Counselors**

Navigators and Certified Application Counselors (CACs) are trained individuals that can help you apply for coverage, shop for plans, answer your questions about your eligibility, an enrollment assister is free.

Website:  
[MAhealthconnector.org](http://MAhealthconnector.org)

### **Serving the Health Insurance Needs of Everyone (SHINE)**

SHINE offers free health insurance information and counseling to all MA residents with Medicare or who are about to become eligible for Medicare. To schedule an appointment, call MassOptions at 1-800-243-4636, or TTY/ASCLL (800) 439-2370.

**Website:**

[mass.gov/health-insurance-counseling](https://mass.gov/health-insurance-counseling)

MassHealth offers free or low-cost coverage to eligible residents for doctor visits, prescription drugs, hospital stays, and many other important services.

Eligibility for MassHealth is based on multiple factors including age, household income, and disability status.

**Website:**

[masshealthchoices.com](https://masshealthchoices.com)

## **How Do I Apply For MassHealth?**

To find out if you qualify for MassHealth, you should fill out the application linked below that matches your age group.

***For individuals under age 65:***

- **Apply:** <https://bit.ly/3y5N1kH>
- **Find help applying**  
<https://bit.ly/3dpa0j2>
- **Renew:** <https://bit.ly/3y1y576>

***For individuals ages 65 and over and/or in need of long-term care:***

- **Apply:** <https://bit.ly/3duw9MC>
- **Eligibility guide**  
<https://bit.ly/3AbMy>
- **Renew:** <https://bit.ly/3h6VzCu>

## Enroll

Once you complete an application and are approved as a MassHealth member, the next step will depend on your age and the type of MassHealth plan you have.

**If you are under 65**, MassHealth is your primary coverage (you do not have another type of health insurance), and you are in MassHealth Standard, CommonHealth, CarePlus, or Family Assistance, you will need to select the insurance plan in which you would like to enroll. On the MassHealth website, you can compare plans and enroll in the one that best matches your needs. If you do not select your own plan, MassHealth will choose one for you. However, you know your health needs best, so it's better if you choose! If you have questions or need help choosing a plan, you can call the MassHealth Customer Service Center at 1-800-841-2900.

**If you are an adult with a disability between the ages of 21 and 64** and have both Medicare and MassHealth Standard or MassHealth CommonHealth, you may be eligible for One Care: <https://bit.ly/365Jwi8>. One Care is a way to get your MassHealth and Medicare benefits together and offers services that you can't get when your MassHealth and Medicare benefits are separate. With One Care: <https://bit.ly/3js6jNm>, you have one plan, one card, and one person to coordinate your care. Once you have both Medicare Part A and B and are a MassHealth member, you can enroll in One Care: <https://bit.ly/2U8ZB44>.

**If you are an older adult**, you may be eligible for Senior Care Options (SCO) and Program of All-Inclusive Care for the Elderly (PACE).

Senior Care Options (SCO): <https://bit.ly/3y5uk0z> is a comprehensive health plan that offers coordinated health care services and social support services. Enrollment is open to MassHealth Standard members who are 65 or older and meet specific eligibility requirements. To enroll in SCO, you must select a Senior Care Organization for your health plan. Please contact the individual Senior Care Organizations: <https://bit.ly/35YH1b1> or MassHealth Customer Service at 1-800-841-2900 to learn more.

The Program of All-Inclusive Care for the Elderly (PACE) is administered by MassHealth and Medicare to provide a wide range of medical, social, recreational, and wellness services. The goal of PACE is to allow participants to live safely in their homes instead of in nursing homes. To enroll in PACE, you must contact the PACE organization that serves the area where you live.

## Accessing Behavioral Health Care

Once you are MassHealth member and have selected your plan, you will be able to use your plan to access behavioral health services.

**If you are a member under age 65 with MassHealth as your primary coverage**, behavioral health services are provided by the Massachusetts Behavioral Health Partnership (MBHP). You can find a behavioral health provider through MBHP Behavioral Health Provider locator.

**If you are a member enrolled in an MCO or Accountable Care Partnership Plan**, the behavioral health care providers you have access to will depend on your plan. It is best to contact your plan directly for information on which behavioral health providers participate in your network. You can visit the MassHealth website and enter your zip code to find contact information of the health plans near you.

**If you are a member enrolled in One Care or Senior Care Options (SCO)**, the behavioral health care provider network you have access to will depend on the plan you have selected. It is best to contact your plan directly for information on which behavioral health providers participate in your network.

**If you are a member enrolled in Program of All-Inclusive Care for the Elderly (PACE)**, you can be connected to behavioral health care through your PACE organization.

## Massachusetts Health Connector

The Health Connector offers health and dental coverage from the state’s leading insurers and provides tools for Massachusetts residents to determine which plans and cost savings you and your family may be eligible for.

Applications for health insurance through the Health Connector are open during a specific period during the year called the “open enrollment period.” Open enrollment is the time of year where people can buy a new insurance plan or change their current plan through the Health Connector or directly through their insurance carrier.

However, you can apply for coverage at any time of the year if:

- You qualify for MassHealth.
- You now qualify for a ConnectorCare plan through the Health Connector after not having qualified in the past.
- You are applying for dental coverage.
- You are a member of a federally recognized tribe or Alaska Native shareholder.
- You have a waiver from the Office of Patient Protection

If you have a qualifying life event—such as a change in your household size (like getting married, divorced, or having a child) or a change in income—you may meet the criteria for a Special Enrollment Period (SEP). A Special Enrollment Period is a time outside of the open enrollment period where you and your family have a right to sign up for health coverage through the Health Connector.

Please visit the Special Enrollment Period page for more information about qualifying life events.

To apply or learn more about your options, visit the Getting Started Guide or contact the Massachusetts Health Connector for assistance. You can also contact Enrollment Assistants for free support in understanding the coverage options available to you. Assistants are trained and certified to help you from application through enrollment into new health insurance plans.

Medicare is the federal health insurance program for people who are 65 or older. Certain people younger than age 65 can qualify for Medicare too, including those with disabilities and those who have End-Stage Renal Disease.

The different parts of Medicare help cover specific services.

- Medicare Part A (Hospital Insurance) covers inpatient hospital stays, care in a skilled nursing facility, nursing home care, hospice care, and some home health care. Most people do not pay a monthly fee (referred to as a monthly premium) for Part A if they or their spouse paid Medicare taxes for a certain amount of time while working.
- Medicare Part B (Medical Insurance) covers certain doctors' services, outpatient care, medical supplies, and preventive services. Everyone pays a monthly premium for Part B which is based on income level.
- Medicare Part D (Rx drug coverage) helps cover the cost of prescription drugs (including many recommended shots or vaccines). Medicare drug coverage is optional, and you must join an approved plan to receive it. Each plan can vary in cost and specific drugs covered. Please visit the Medicare website for more information on getting Medicare prescription drug coverage.

**Original Medicare** includes Part A (hospital insurance) and Part B (Medical Insurance). You can join a separate Medicare drug plan (Part D) if you need drug coverage. With Original Medicare, you can use any doctor or hospital that takes Medicare, anywhere in the U.S. Please visit the Medicare website for more information on how Original Medicare works.

**Medicare Advantage** (also known as Part C) is an alternative to Original Medicare that includes Part A, Part B, and usually Part D (Rx drug coverage). Most plans also offer extra benefits that Original Medicare doesn't cover. These plans may have lower out-of-pocket costs than Original Medicare. In many cases, you'll need to use doctors and other providers who are in your plan's network and service area for the lowest costs. Please visit the Medicare website to learn more about how Medicare Advantage Plans work.

## Applying and Enrolling

The process for getting started with Medicare depends on your unique situation, so the best first step is to visit the Medicare website to learn about your options. If you would prefer to speak with someone to help you navigate the process, you can schedule a free appointment with a health insurance counselor through the SHINE Program.

## Private Insurance Carriers

Find out more about your options for insurance coverage in Massachusetts.

Most people who have health insurance in Massachusetts sign up for coverage through their employer. If you do not have access to health insurance coverage through an employer, you may be eligible for publicly funded insurance plans, like MassHealth or Medicare.

## Individual Coverage

One way to get individual coverage is to buy a health plan directly from an insurance company. You can call a health insurance company directly to enroll in a plan designed for individuals, families, or small groups. Many self-employed residents obtain health coverage this way. You can find a list of the companies that offer these plans at the Division of Insurance website.

You can also purchase insurance through the Massachusetts Health Connector.

## Massachusetts Health Connector

The Health Connector offers health and dental coverage from the state's leading insurers and provides tools for Massachusetts residents to determine which plans and cost savings you and your family may be eligible for.

## Apply

Applications for health insurance through the Health Connector are open during a specific period during the year called the "open enrollment period." Open enrollment is the time of year where people can buy a new insurance plan or change their current plan through the Health Connector or directly through their insurance carrier.

However, you can apply for coverage at any time of the year if:

- You qualify for MassHealth.
- You now qualify for a ConnectorCare plan through the Health Connector after not having qualified in the past.
- You are applying for dental coverage.

- You are a member of a federally recognized tribe or Alaska Native shareholder.
- You have a waiver from the Office of Patient Protection.

If you have a qualifying life event—such as a change in your household size (like getting married, divorced, or having a child) or a change in income—you may meet the criteria for a Special Enrollment Period (SEP). A Special Enrollment Period is a time outside of the open enrollment period where you and your family have a right to sign up for health coverage through the Health Connector. Please visit the Special Enrollment Period page for more information about qualifying life events.

To apply or learn more about your options, contact the Massachusetts Health Connector for assistance. You can also contact Enrollment Assistants for free support in understanding the coverage options available to you. Enrollment Assistants are trained and certified to help you from application through enrollment into new health insurance plans.

## **Accessing Mental Health and Substance Use Services**

To better understand the mental health and substance use benefits covered by your health plan, it's best to visit your health insurance carrier's website or contact the customer service number on your health insurance card. William James INTERFACE has a guide for families and individuals seeking mental health services that can help you understand various aspects of mental health insurance coverage and offers ideas about how to get started, questions to ask an insurance company, and a glossary of insurance terms.

## **Accessing Mental Health and Substance Use Services for Children and Adolescents**

If you are unsure if your insurance plan covers the behavioral health services your child needs, the experts at the Autism Insurance Resource Center (AIRC) can help (even if your child doesn't have autism). Many Massachusetts private health insurance plans now cover certain behavioral health services for children and adolescents. This includes services such as intensive care coordination and in-home therapy. Knowledgeable experts at the AIRC can answer questions about insurance coverage, advise on how to access treatment, and advise on how to get help with payments. Call 774-455-4056 or visit AIRC's website for free assistance.

**MOAR** would like to thank the Massachusetts Association for Mental Health for health insurance information!

## What is Parity?

Parity is Equality. The Federal and Massachusetts Mental Health and Addiction Parity Laws make it illegal for health plans to discriminate against persons with addiction and/or mental illnesses. Health plans should be providing the same level of services for addiction and mental illness as done for other “physical” illnesses like heart disease, diabetes, or arthritis.

## How Does Parity Help?

Research shows addiction and many mental health disorders are diseases of the brain. Parity laws require insurance companies and health plans to recognize these health issues as biologically based, “physical” illnesses and to pay equally for diagnosis and treatment. Your health plan may be required to pay for the following services to treat addiction if they pay for similar services treating other health conditions.

Acute treatment	Clinically managed detox services
Partial hospitalization	Intensive outpatient programs
Day treatment	Crisis stabilization
In-home therapy	Rehabilitations

**Health plans can’t** have treatment limits for addiction and mental health disorders that are different than those for other health issues. Any limits on how often you can seek care, number of visits, or days of coverage must be the same as those for medical or surgical benefits.

**Health plans are not to** require higher or additional deductibles, higher co-payments, co-insurance or higher out-of-pocket expenses for addiction and mental health treatment than what they charge for other medical conditions.

## How Do I Ensure My Rights Are Met?

- Parity requires health plans to provide consumers with the reason for why you were denied coverage of services.
- Parity requires health plans to provide the criteria they used to decide if the treatment is medically necessary (for services like detox support) or to decide whether they will continue covering services you are already receiving (for services like outpatient counseling and granting more visits to a counselor).
- If you or a family member is denied coverage, ask for written documentation of both the reasons why they aren't covering the service and the criteria they used to make a decision. The insurer must give it to you.

**Keep Records: Keep a log of all phone calls and written communication (letters and email).**

**Appeal the Denial - More than 50% of appeals are successful.**

### Got Denied Addiction Treatment By Your Insurance?

**Recovery is about Asking for Help - Get Help Now!**

**Massachusetts Attorney General's Office – 1-888-830-6277**

**Health Law Advocates:** An organization that provides free legal services to persons of low-income who are denied access to health care. Health Law Advocates works with people who have MassHealth or private insurance. No matter what your income, if you are denied access to addiction treatment by your health plan:

**Call Health Law Advocates: 617-388-5241**

**Visit their website: [www.healthlawadvocates.org](http://www.healthlawadvocates.org)**

### **Office of Patient Protection (OPP), MA Health Policy Commission:**

Consumers who are fully insured by a MA-licensed insurer or HMO have the right to appeal a health plan's denial of services when the denial is based on medical necessity. If you have gone through all possible steps of a health plan's appeal process, you have a right to an independent external review through the Office of Patient Protection (OPP). Please note OPP cannot help with self-funded employer plans, MassHealth/Medicaid, Medicare, federal employee health plans or out-of-state insurance.

**Call the Office of Patient Protection: 1-800-436-7757**

**Massachusetts consumers** and anyone receiving health coverage from a MA carrier, insurer or HMO are entitled to protections covering your rights to services.

**Contact Bureau of Managed Care within the Division of Insurance  
617-521-7372**

## Health Care For All

**Health Care for All's Helpline** is a resource that is free and available to everyone. The Helpline is here to answer your questions about healthcare in Massachusetts. It can help you with everything from general insurance questions to specific information you need about a personal health issue. Other issues you might have include questions about co-payments, health insurance rules, directions, whether you're eligible for a program, or more.

**Health Care for All's Health Helpline: 1-800-272-4232**

## Tell Us How Parity is Working for You

**MOAR** helps individuals and families exercise their rights. Let us know if you have been denied coverage or required to pay additional co-pays or out-of-pocket expenses for addiction and/or mental health treatment.

Are you getting the treatment you or your family members need? Have you made an appeal?

Your right to recovery is important to **MOAR**! Let us know!

## Sobering Housing

Massachusetts Alliance for Sober Housing

The Massachusetts Alliance for Sober Housing (MASH) exists to ensure and promote critical management, operational, and ethical standards of sober homes, as well as to promote technical assistance to new and existing homes.

MASH's recovery values emphasize health, home, purpose, and community. Successful sober homes establish and reinforce healthy lifestyles, provide a safe and stable place to live, conduct meaningful activities, and build relationships and social networks for support.

Through a network of certified sober housing and empirically based recovery principles, MASH's goal is to help create and foster these safe living environments for those with substance use disorders.

### What Is A Sober Home?

Sober Home is a broad term describing a sober, safe, and healthy living environment that promotes recovery from alcohol and other drug use and associated behaviors. They are sober living environments, meaning that residents are expected to abstain from alcohol and illegal drug use.

#### **All Sober Homes are Not Alike!**

At a minimum, Sober Homes offer peer-to-peer recovery support. Some are not very structured and are more appropriate for those who have an established recovery program and simply desire to live in an alcohol/drug free environment with other sober people to help support their recovery efforts.

Other Sober Homes have greater structure with more rules, perhaps a curfew, one or more weekly in-house meetings, encourager referrals to outpatient use/ mental health providers in the local community, etc.

Before considering a Sober Home, it is important to think about your needs. It's always a good idea to visit a Sober Home before committing to live there.

For a list of all MASH Certified Sober Homes in Massachusetts  
Visit: [MASHsoberhousing.org](http://MASHsoberhousing.org). Call: 781-472-2624

## Education and Vocational Assistance

Massachusetts Rehabilitation Commission is a government agency responsible for Vocational Rehabilitation Services, Community Services, and eligibility determination for the Social Security Disability Insurance (SSDI) and the Supplemental Security Income (SSI) federal benefits programs.

## Higher Education Opportunities In Massachusetts

Competition in today's labor market frequently requires advanced training, including a two or four-year college degree. If it makes good sense, a vocational plan for rehabilitation based on college training may be developed.

## Alternatives For Funding Your Education

MRC has programs such as PASS to help pay for an education or vocational training. MRC 1-617-204-3603 Employer Services 1-800-245-6543. Call to find out where the nearest Massachusetts Rehab Office is near you.

**Visit: [www.NewEnglandADA.org](http://www.NewEnglandADA.org)**

## How to Cope with a CORI

### **CORI stands for Criminal Offender Record Information**

- A criminal record – (CORI) – is created for a person from the moment he or she is arrested by the police, to the time he or she is arraigned and processed through various criminal justice agencies including probation, jail, or parole.
- By law, various public and private agencies, social services agencies, employers, and housing providers have or can get access to CORI.

### **CORI Sealing Information**

- Obtain a copy of your criminal record.
- With a Massachusetts driver's license or a Massachusetts ID card, request your CORI online or mail a notarized CORI request form to DCJIS with a money order for \$25. If you are indigent, the fee can be waived if you send in an Affidavit of Indigency.
- Visit [www.gbls.org/cori\\_record\\_sealing\\_booklets](http://www.gbls.org/cori_record_sealing_booklets) for forms.
- A criminal record can usually be sealed for a misdemeanor after 3 years and for a felony after a 7-year waiting period.

### **Have a C-O-R-I? Create a C-O-R-I Support Package!**

Gather recent letters from social workers, employers, probation officers, parole officers, landlords and clergy attesting your good character or evidence of using support for a new life as you look for jobs and housing.

### **Letters need to explain:**

- Most serious convictions on the criminal record
- Recent activity demonstrating a commitment for positive change.
- Strengths and skills of the ex-offender
- Why the record should not stand in the way.

### **Be Proactive and Persistent**

# HELP SAVE LIVES IN THE COMMONWEALTH

## Massachusetts 911 Good Samaritan Campaign

### Preventing Fatal Overdoses in Massachusetts

Several legislative proposals to prevent fatal overdoses were considered before the state legislature from 2008- 2012. On August 2<sup>nd</sup> of 2012, 911 Good Samaritan language<sup>h</sup> with expanded prescribing and administration of Naloxone (Narcan®), a medication used to reverse a potentially fatal opioid overdose was signed into law.

#### Summary and Background:

From 2002-2010, 5529 Massachusetts residents died from opioid-related overdoses (e.g. heroin, oxycodone, or fentanyl).<sup>1</sup> Most of these deaths could have been prevented. In most cases if 911 is called quickly, the victim will survive, but fear of police involvement and criminal prosecution prevents many people from calling for help. Immediately calling 911 could also help prevent damage to the victim's brain or body that can occur during an overdose. The Massachusetts Department of Public Health is a strong proponent of this measure.

#### What the law will do:

- Protect people from prosecution for possession of controlled substances when calling 911
- Save lives and give people who use opioids a chance to get help for their addiction
- Increase the likelihood that witnesses will call 911 during an overdose

#### What the law will not do:

- Does not interfere with law enforcement securing the scene at an overdose
- Does not prevent prosecution for drug trafficking
- Does not prevent prosecution for outstanding warrants

#### What law will, also, do:

Beyond offering protection from drug possession charges for people who call 911 and the person, whom overdose emergency medical attention is sought, legal protection is given to medical professionals who

- Prescribe naloxone (Narcan - a medication that reverses opiate overdoses) to a family member or acquaintance of someone suffering from opiate addiction, who may need to
- Administer naloxone to reverse a potential fatal opiate overdose

#### Thank You to Campaign Members:

Thank You to former Senator Steven Tolman, Senate President Murray, Mental Health and Substance Abuse Committee CoChairs, Senator John Keenan and Representative Malia; Senator Cynthia Creem, Senator Jennifer Flanagan, Representative Alice Peisch, Representative James O'Day, and Representative Martin Walsh for asserting leadership to make this law happen!

Thank You to The Massachusetts Department of Public Health. Thank You to the many family members and persons in recovery, who gave real life testimony!

## Quick Facts

- **The 911 Good Samaritan law does not interfere with law enforcement efforts** to assess the scene of an overdose for public safety.
- Studies show over **50%** of people interviewed reported they **did not call 911 during an overdose due to their fear of police involvement.**
- **More deaths occur in private settings**, where people are less likely to call 911 due to fear of police involvement. Bystanders are more likely to call for help in overdoses that occur in public settings than in private settings such as homes or hotels.
- In 2008, community assessments were done in Brockton, Cambridge, Charlestown, Fall River, Gloucester, Jamaica Plain/Roxbury, Lowell, Lynn, New Bedford, Revere, Springfield, and Worcester. **Fear of police involvement was the major reason given for not calling 911**, a leading contributing cause of Massachusetts fatal overdoses.
- As part of a DPH overdose prevention project, between November 2007 and November 2015, at least **38,000 persons were trained to prevent, recognize, and respond to an opioid overdose and administer naloxone (Narcan®).** Within that time frame, DPH documented reversal of over 5800 potentially fatal overdoses.
- In 2008, the **US Conference of Mayors** unanimously urged all state governments to adopt emergency “**Good Samaritan**” laws.
- **Massachusetts is one of 45 states** and the District of Columbia **that now have a Good Samaritan Law.** Every state in the United States has a drug overdose Good Samaritan Law in place except Kansas, Maine, Oklahoma, Texas, Wyoming.

## Recovery Month

### September is Recovery Month

**Recovery Month** highlights the achievements of individuals who have reclaimed their lives in long-term recovery and honors the treatment and recovery service providers who make recovery possible. Recovery Month promotes the message that recovery in all its forms is possible. It encourages all to take action to help expand and improve the availability of effective prevention, treatment, harm reduction, and recovery support services for those in need.

**Recovery Month** has a new logo that signifies the true meaning and values of the Recovery Month observance which, since its national inception in 1989, has positively changed many lives. The Recovery Month logo features an “r” symbol, representing “r” is for Recovery and the need to support the millions of individuals who are proudly living their lives in recovery.

**MOAR** will be inviting everyone to help plan and participate in  
The 33<sup>rd</sup> Annual Statewide Recovery Month Celebration  
with the support of the Massachusetts Department of Public Health, Bureau  
of Substance Addiction Services (MA DPH/BSAS) and you!

“Recovery is for Everyone:  
Every Person, Every Family, Every Community.”

We look forward to participating in community celebrations.  
Faces and Voices of Recovery and SAMHSA will be providing  
national information.

***MOAR is a grass-roots organization started by volunteers on behalf of people in recovery and their families.***

The **MOAR** mission is “to organize recovering individuals, families and friends into a collective voice to educate the public about the value of recovery from alcohol and other addictions. **MOAR** envisions a society where addiction is treated as a significant public health issue and recovery is recognized as valuable to all our communities.”
